

.022uf for '67 & '68  
.0022uf '69 and later

'67 & '68 would have used a shared cathode  
'69 and later are typically the split type shown

'67 had 270K mix resistors  
'68 and later used 470K

bright caps were originally 100pf and their  
value increased over the years to 250pf, 500pf  
and later as high as 5,600pf

output coupling caps were .1uf early on  
then became .022uf
